Minutes of the Seventh Client Meeting

Group 14B

Monday 29th April 2024

Client: Cruz Izu
Chair: Shiwen Cao
Secretary: Lanxi Zhang
Participants: Zhige Zhang, Jingqi Wang

1 Time and Place

The seventh client meeting for the MCI Group Project was held in IW 4.21 at 3:10pm on Monday 29th April 2024.

2 Agenda

1) Requesting client feedback upon completion of Milestone 1 and the final milestone.

2) Presenting the current interactions between the front-end and back-end to clients.

3 Discussion

1)   First milestone & Final milestone

•   Regarding the achieved output, it's unnecessary to delve into excessive details. If more than the planned portion of the project is completed, include additional feedback and enhancements after 'planned'.

•   In the reflection section of project progress, highlighting team discussions and acknowledging user feedback contributions can significantly improve project processes.

•   The database and data structure sections can be combined, and any overly descriptive content can be streamlined for conciseness without excessive detail.

2)   Further Requirements of project

•   Authentication Board:

   - Implement quick API integrations such as logging in with Google or Facebook.

   - Distinguish between normal users and a admin; the admin has exclusive password. The review section is accessible only to admin.

- Extension: Enable login to the site using email and password.

• Interface differentiation:

	Home Page Section	Further requirement
Normal Users	'submission', 'discussion'	Tags(mentioned detail below) Extension: alert box
Admin	'submission', 'acceptance', 'discussion'	Acceptance has two buttons show if admin accept the post

• Tags:

- Implement tag-based filtering, allowing users to click on tags to filter content.

- When users select similar tags, prompt them with a message: "A user has previously entered this tag. Do you want to use it as your own tag?"

- Enable automatic tag generation, such as suggesting tags as users type (e.g., autocomplete)

4 Next Steps:

1) Optimise the document of first milestone and the final milestone.

2) Allign with milestone and continue connection back-end with front-end in discussion page.

5 Next Meeting:

The 8th Client Meeting will send an email to inquire about the client's availability.
