Minutes of the Ninth Client Meeting

Group 14B

Monday 20th May 2024

Client: Cruz Izu
Chair: Zhige Zhang
Secretary: Zhangchi Pan
Participants: Lanxi Zhang, Jingqi Wang, Shiwen Cao

1 Time and Place

The ninth client meeting for the MCI Group Project was held in IW 4.21 at 3:20 Pm on 20th May
2024.

2 Agenda

1.Showcase the completed functionalities that were developed based on feedback from the last
meeting.
2. Collect client feedback on the implemented features, discuss their usability, and identify potential
areas for improvement.
3. Review the remaining tasks, prioritize them according to client feedback and the project timeline,
and outline the next steps.

3 Discussion

1) Login function

It is better to require users to log in when they submit a code example rather than on the home page,
as it can increase the interactivity of the website.

2) Admin Mode

1. In admin mode, allow administrators to add multiple tags instead of only modifying existing tags.

2. In admin mode, grant administrators the authority to delete replies and issues, and add "close
issue" and "close comments" buttons to give administrators the ability to stop the addition of more
issues and comments.

3. In admin mode, "close discussion" should be displayed on the code discussion page rather than

on the code sample lists page.

3） User

Users should be able to edit and delete replies and issues, provided that the replies and issues have not been responded to or liked.

4）Further Requirements of project (Extension)

Add a "generate report" feature with two types of reports. One is the "close statement," which can only be generated when the discussion is closed. The other is the "long report," which can be generated without closing the discussion and produces a PDF recording the current code example along with the associated discussion and replies.

4 Next Steps:

1. Fix existing bugs.

2. Move "close discussion" to the code example review page, allowing administrators to close the discussion for the current code example.

3. Allow administrators to add tags.

5 Next Meeting:

The 10th Client Meeting will be hold on Monday 3.10 pm 27th of May
